FDA Grants Accelerated Approval to Mosunetuzumab-Axgb for Relapsed or Refractory Follicular Lymphoma

On December 22, 2022, the Food and Drug Administration (FDA) granted accelerated approval to mosunetuzumab-axgb (Lunsumio, Genentech, Inc.), a bispecific CD20-directed CD3

T-cell engager for adult patients with relapsed or refractory follicular lymphoma (FL) after two or more lines of systemic therapy. Mosunetuzumab-axgb was evaluated in an open-label, multicenter, multi-cohort study. The efficacy population consisted of 90 patients with relapsed or refractory FL who had received at least two prior lines of systemic therapy, including an anti-CD20 monoclonal antibody and an alkylating agent.

The recommended mosunetuzumab-axgb dose is 1 mg on Cycle 1 Day 1, 2 mg on Cycle 1 Day 8, 60 mg on Cycle 1 Day 15, 60 mg on Cycle 2 Day 1, and 30 mg on Day 1 in subsequent cycles. A treatment cycle is 21 days. Mosunetuzumab-axgb should be administered for 8 cycles unless patients experience unacceptable toxicity or disease progression. After 8 cycles, patients with a complete response should discontinue therapy. Patients with a partial response or stable disease should continue treatment up to 17 cycles unless they experience progressive disease or unacceptable toxicity.
